It's fascinating to read how the main character suddenly needs ...By CustomerIt's fascinating to read how the main character suddenly needs to adjust his own reactions when, by chance, he becomes acquainted with one of his patient. In addition of being a real page-turner the novel offers a very interesting, almost metaphysical questioning for the reader: the patient happens to be the same age as the surgeon and he is also going to become a father.... Would the patient be somehow David's own reflection in the mirror?....1 of 1 people found the following review helpful. A Brilliant StoryBy Daniel SpiegelOren Berkowitz has written a deeply heart-warming and inspiring work of fiction that anyone would enjoy. The narration has the perfect mix of plot-driven story telling, technical detail about medicine and reflection about life and values. I read the book in one day because I couldn't put it down.I eagerly await Mr. Berkowitz's next works.1 of 1 people found the following review helpful. A great book!By ElisabethI just loved the book. It really shows how life can be tragic and beautiful too, and it touched me. I like how the personality of the brain surgeon evolved, and the way emotions build up; I felt sorrow and joy for the different characters. I had to finish it. It is well written, well structured and interesting. A good read!

Dr. David Singer is a rising star brain surgeon in the City of Pittsburgh. He did all the right things and made all the right sacrifices to get to where he is. Despite everything he has going for him, he finds himself struggling to balance his career with his newly growing family. His one-track focus is jarred by a budding friendship with a special patient who holds a mirror up to his own life. The Brain Surgeon takes you for a behind the scenes look at this rare specialty from the perspective of the surgeon. In the hypercompetitive, high stakes, and unforgiving world of neurosurgery, is it possible to find some kind of balance?

About the AuthorDr. Berkowitz is the Director of Research and a founding faculty member of the Boston University School of Medicine Physician Assistant Program. He holds a PhD in Epidemiology from the University of Pittsburgh and has practiced for many years as a PA in neurosurgery. Dr. Berkowitz is a researcher and a medical educator who has published numerous works in neurosurgery and healthcare research journals. He lives with his wife and son in Boston, Massachusetts.
